

Is AWS compliant with the NIST 800-53 framework?

Yes, AWS Cloud infrastructure and services have been validated by third-party testing performed against the NIST 800-53 Revision 4 controls, as well as additional FedRAMP requirements. AWS has received FedRAMP Authorizations to Operate (ATO) from multiple authorizing agencies for both AWS GovCloud (US) and the AWS US East/West Region. For more information, see the [AWS FedRAMP compliance](#) webpage, or the following FedRAMP Marketplace webpages:

- [AWS East/West Region complete list of authorizing agencies](#)
- [AWS GovCloud \(US\) complete list of authorizing agencies](#)
- [AWS GovCloud JAB P-ATO at the high baseline](#)

What are my customer responsibilities to align my AWS systems with NIST frameworks?

How can AWS help me achieve alignment with NIST frameworks?

How should I use the NIST CSF?
